METAL INSETS

Name: ..... **Date:** .....

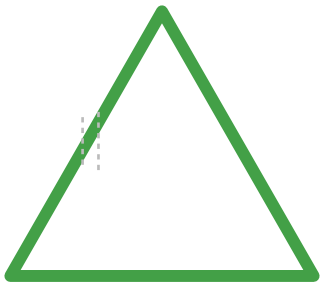

Metal inset work on paper: trace the colored outline with a pencil, then fill the shape with straight lines from top to bottom, close together, without going over the edge. Change color for a second layer of lines going the other way.

circle

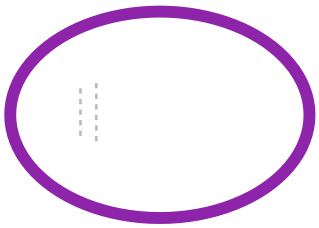

square

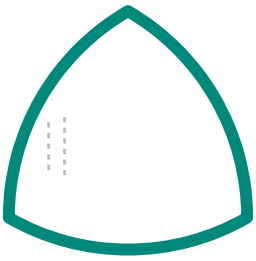

triangle

rectangle

ellipse

curvilinear triangle

The faint dashes inside each shape show how close the pencil lines should be. This is handwriting preparation: pencil grip, light pressure and stopping at a line.
