MULTIPLY A FRACTION BY A FRACTION

Name: ..... **Date:** .....

Multiply the numerators, multiply the denominators, then write the answer in lowest terms. No common denominator is needed for multiplying.

1. $\frac{1}{4} \times \frac{1}{4} =$ ____
2. $\frac{3}{8} \times \frac{4}{5} =$ ____
3. $\frac{2}{3} \times \frac{2}{3} =$ ____
4. $\frac{3}{4} \times \frac{3}{4} =$ ____
5. $\frac{1}{2} \times \frac{1}{3} =$ ____
6. $\frac{3}{4} \times \frac{1}{2} =$ ____
7. $\frac{5}{6} \times \frac{1}{2} =$ ____
8. $\frac{5}{8} \times \frac{2}{3} =$ ____
9. $\frac{3}{4} \times \frac{2}{5} =$ ____
10. $\frac{1}{3} \times \frac{5}{6} =$ ____
11. $\frac{2}{5} \times \frac{1}{3} =$ ____
12. $\frac{2}{3} \times \frac{1}{4} =$ ____
13. $\frac{4}{5} \times \frac{1}{3} =$ ____
14. $\frac{1}{2} \times \frac{3}{5} =$ ____
15. $\frac{3}{5} \times \frac{3}{4} =$ ____
16. $\frac{2}{7} \times \frac{1}{2} =$ ____

Worked example: $\frac{2}{3} \times \frac{3}{4} = \frac{6}{12} = \frac{1}{2}$. Notice the answer is smaller than both fractions you started with.

MULTIPLY A FRACTION BY A FRACTION ANSWER KEY

Name: ..... Date: .....

Multiply the numerators, multiply the denominators, then write the answer in lowest terms. No common denominator is needed for multiplying.

1. $\frac{1}{4} \times \frac{1}{4} = \frac{1}{16}$
2. $\frac{3}{8} \times \frac{4}{5} = \frac{3}{10}$
3. $\frac{2}{3} \times \frac{2}{3} = \frac{4}{9}$
4. $\frac{3}{4} \times \frac{3}{4} = \frac{9}{16}$
5. $\frac{1}{2} \times \frac{1}{3} = \frac{1}{6}$
6. $\frac{3}{4} \times \frac{1}{2} = \frac{3}{8}$
7. $\frac{5}{6} \times \frac{1}{2} = \frac{5}{12}$
8. $\frac{5}{8} \times \frac{2}{3} = \frac{5}{12}$
9. $\frac{3}{4} \times \frac{2}{5} = \frac{3}{10}$
10. $\frac{1}{3} \times \frac{5}{6} = \frac{5}{18}$
11. $\frac{2}{5} \times \frac{1}{3} = \frac{2}{15}$
12. $\frac{2}{3} \times \frac{1}{4} = \frac{1}{6}$
13. $\frac{4}{5} \times \frac{1}{3} = \frac{4}{15}$
14. $\frac{1}{2} \times \frac{3}{5} = \frac{3}{10}$
15. $\frac{3}{5} \times \frac{3}{4} = \frac{9}{20}$
16. $\frac{2}{7} \times \frac{1}{2} = \frac{1}{7}$

Why did the answers get smaller? Taking a fraction of a fraction means a part of a part: half of a third is smaller than either.
