# ONE-STEP EQUATION WORD PROBLEMS

**Name:** ..... **Date:** .....

Write a one-step equation for each problem (choose a letter for the unknown), solve it, and answer in a sentence with a unit. Then check the four solutions at the bottom by substituting.

**1.** Ava had some stickers. She gave away 8 and has 15 left. How many did she start with?

**2.** Four friends share the cost of a gift equally. Each pays $9. What did the gift cost?

**3.** A rope is cut into 6 equal pieces of 7 feet each. How long was the rope?

**4.** Ben saved $14 more this month than last month. He saved $31 this month. How much did he save last month?

**5.** A box of 8 identical pencils weighs 96 grams. How much does one pencil weigh?

**6.** After the temperature dropped 9 degrees it was 4 degrees. What was it before?

## CHECK BY SUBSTITUTING: IS THE SOLUTION CORRECT?

| | | | |
|---|---|---|---|
| $3x = 21$<br>$x = 7$<br>correct / incorrect | $x + 9 = 15$<br>$x = 24$<br>correct / incorrect | $x/4 = 5$<br>$x = 20$<br>correct / incorrect | $x - 6 = 10$<br>$x = 4$<br>correct / incorrect |

# ONE-STEP EQUATION WORD PROBLEMS ANSWER KEY

**Name:** ..... **Date:** .....

Answer key: one equation and its solution for each problem.

**1.** Ava had some stickers. She gave away 8 and has 15 left. How many did she start with?

**s − 8 = 15, s = 23 stickers**

**2.** Four friends share the cost of a gift equally. Each pays $9. What did the gift cost?

**g/4 = 9, g = $36**

**3.** A rope is cut into 6 equal pieces of 7 feet each. How long was the rope?

**r/6 = 7, r = 42 feet**

**4.** Ben saved $14 more this month than last month. He saved $31 this month. How much did he save last month?

**m + 14 = 31, m = $17**

**5.** A box of 8 identical pencils weighs 96 grams. How much does one pencil weigh?

**8p = 96, p = 12 grams**

**6.** After the temperature dropped 9 degrees it was 4 degrees. What was it before?

**t − 9 = 4, t = 13 degrees**

## CHECK BY SUBSTITUTING: IS THE SOLUTION CORRECT?

| | | | |
|---|---|---|---|
| 3x = 21<br>x = 7<br>**correct** | x + 9 = 15<br>x = 24<br>**incorrect** | x/4 = 5<br>x = 20<br>**correct** | x − 6 = 10<br>x = 4<br>**incorrect** |
