PERCENT CHANGE: INCREASE OR DECREASE

Name: ..... **Date:** .....

Percent change compares the change to the ORIGINAL amount: change ÷ original × 100. Write the percent and circle increase or decrease.

1. **from 40 to 50** ____ % increase decrease
2. **from 80 to 60** ____ % increase decrease
3. **from 20 to 25** ____ % increase decrease
4. **from 50 to 40** ____ % increase decrease
5. **from 200 to 250** ____ % increase decrease
6. **from 60 to 45** ____ % increase decrease
7. **from 120 to 150** ____ % increase decrease
8. **from 25 to 20** ____ % increase decrease
9. **from 300 to 360** ____ % increase decrease
10. **from 90 to 72** ____ % increase decrease

Worked example: a price goes from 40 to 50. The change is 10. 10 ÷ 40 = 0.25 = **25% increase**. From 80 to 60: change 20, 20 ÷ 80 = 0.25, a **25% decrease**. Same change, different percent, because the original amounts differ.

PERCENT CHANGE: INCREASE OR DECREASE ANSWER KEY

Name: ..... **Date:** .....

Answer key.

1. **from 40 to 50** — **25% increase**
2. **from 80 to 60** — **25% decrease**
3. **from 20 to 25** — **25% increase**
4. **from 50 to 40** — **20% decrease**
5. **from 200 to 250** — **25% increase**
6. **from 60 to 45** — **25% decrease**
7. **from 120 to 150** — **25% increase**
8. **from 25 to 20** — **20% decrease**
9. **from 300 to 360** — **20% increase**
10. **from 90 to 72** — **20% decrease**

Worked example: a price goes from 40 to 50. The change is 10. 10 ÷ 40 = 0.25 = **25% increase**. From 80 to 60: change 20, 20 ÷ 80 = 0.25, a **25% decrease**. Same change, different percent, because the original amounts differ.
