THE FIRST 20 ELEMENTS

Name: ..... **Date:** .....

Part 1: fill in the missing names and symbols. Part 2: answer in full sentences.

PART 1: NAMES AND SYMBOLS

Atomic number	Element	Symbol	Atomic number	Element	Symbol
1	Hydrogen		11		Na
2		He	12	Magnesium	
3	Lithium		13		Al
4		Be	14	Silicon	
5	Boron		15		P
6		C	16	Sulfur	
7	Nitrogen		17		Cl
8		O	18	Argon	
9	Fluorine		19		K
10		Ne	20	Calcium	

PART 2: THINK ABOUT IT

Why is the symbol for sodium Na and not S or So?

Which other element in the first 20 has a symbol that does not match its English name? What is it from?

Write the symbols of the four elements that make up about 96% of the human body.

THE FIRST 20 ELEMENTS ANSWER KEY

Name: ..... **Date:** .....

PART 1: NAMES AND SYMBOLS

1 Hydrogen H | 11 Sodium Na

2 Helium He | 12 Magnesium Mg

3 Lithium Li | 13 Aluminium Al

4 Beryllium Be | 14 Silicon Si

5 Boron B | 15 Phosphorus P

6 Carbon C | 16 Sulfur S

7 Nitrogen N | 17 Chlorine Cl

8 Oxygen O | 18 Argon Ar

9 Fluorine F | 19 Potassium K

10 Neon Ne | 20 Calcium Ca

PART 2: THINK ABOUT IT

1. It comes from the Latin name natrium. S was already taken by sulfur, and symbols are one or two letters from the element's Latin or historical name. 2. Potassium, K, from the Latin kalium. 3. O, C, H, N (oxygen, carbon, hydrogen, nitrogen).
