Name: _____ Date: _____

1. Which fraction is equivalent to 1/2?

   A. 1/3

   B. 2/4

   C. 3/6

   D. 4/8

2. What number goes in the box to make the fractions equivalent? 2/4 = 3/□

   A. 5

   B. 6

   C. 7

   D. 8

3. Which of these fractions is equal to 4/8?

   A. 1/4

   B. 1/2

   C. 2/3

   D. 3/4

4. If you multiply the top and bottom of 2/3 by 2, what is the new fraction?

A. 4/6

B. 4/3

C. 2/6

D. 4/5

5. Which fraction is equivalent to 5/10?

A. 1/5

B. 1/2

C. 2/5

D. 3/5

6. To make the fraction 2/4 equivalent to 6/12, we multiply the numerator and denominator by ___.

7. The fraction 3/5 is equivalent to ___.

8. The fraction 1/2 is equivalent to 2/4.

True False

9. The fraction 3/4 is equivalent to 3/8.

True False

10. Find two fractions that are equivalent to 1/2.

Answer Key

1. Which fraction is equivalent to 1/2?

Answer: B

To find an equivalent fraction, multiply the top and bottom by the same number. 1 × 2 = 2 and 2 × 2 = 4, so 1/2 is the same as 2/4.

2. What number goes in the box to make the fractions equivalent? 2/4 = 3/□

Answer: B

To get from 2 to 3 in the top number, you add 1 or think of it as 1.5 times. However, a simpler way for grade 4 is to simplify 2/4 to 1/2. Then, to get from 1 to 3, you multiply by 3. So you must multiply the bottom 2 by 3, which gives 6.

3. Which of these fractions is equal to 4/8?

Answer: B

You can simplify 4/8 by dividing both the top and bottom by 4. 4 divided by 4 is 1, and 8 divided by 4 is 2. So, 4/8 is the same as 1/2.

4. If you multiply the top and bottom of 2/3 by 2, what is the new fraction?

Answer: A

Multiply the top number: 2 × 2 = 4. Multiply the bottom number: 3 × 2 = 6. The new fraction is 4/6.

5. Which fraction is equivalent to 5/10?

Answer: B

To simplify 5/10, divide the top and bottom by 5. 5 divided by 5 is 1, and 10 divided by 5 is 2. So, 5/10 is the same as 1/2.

6. To make the fraction 2/4 equivalent to 6/12, we multiply the numerator and denominator by ___.

Answer: 3

Multiplying the numerator 2 by 3 gives 6, and multiplying the denominator 4 by 3 gives 12.

7. The fraction 3/5 is equivalent to ___.

Answer: 6/10

Multiplying both the numerator and the denominator of 3/5 by 2 results in 6/10.

8. The fraction 1/2 is equivalent to 2/4.

Answer: True

Both fractions represent the same amount. If you multiply the top and bottom o

Get Cla...

9. The fraction 3/4 is equivalent to 3/8.

Answer: False

These fractions are not the same. 3/4 is a larger amount than 3/8 because the pieces in 3/4 are bigger.

10. Find two fractions that are equivalent to 1/2.

Answer: Two fractions equivalent to 1/2 are 2/4 and 3/6. You can find these by multiplying the top number (numerator) and the bottom number (denominator) by the same number. For example, 1 × 2 = 2 and 2 × 2 = 4, so 2/4 is equivalent. Also, 1 × 3 = 3 and 2 × 3 = 6, so 3/6 is equivalent.
